

FOR IMMEDIATE RELEASE

**AURALEX ACOUSTICS ANNOUNCES THE RELEASE
OF THE NEW SPACEARRAY™ DIFFUSOR AT AES 2005**

NEW YORK CITY, October 7, 2005—Auralex Acoustics, Inc., the industry leader in innovative sound control solutions, is proud to announce the availability of the new SpaceArray™ diffusor at AES 2005, booth #150. In keeping with the Auralex mission to provide the best acoustical treatment products at the best value, the SpaceArray delivers superior performance at a popular price point.

“Until recently, this caliber of acoustic treatment was only available to a select few,” says Jeff Szymanski, chief acoustical engineer for Auralex. “Now, all of that is changing as we make these exceptional products affordable.”

Designed by Russ Berger for Auralex Acoustics, the SpaceArray combines excellent hemispherical acoustical diffusion with a top quality wood finish. Based on a quasi-random series that provides superior performance without visual patterning, the SpaceArray is ideal for control rooms, auditoriums, performance venues, listening rooms, home theaters and worship spaces. Strong and lightweight, the beautiful 24”x24” solid wood panels install easily and can be used in a variety of placement options.

The SpaceArray is one of the first offerings in the new pArtScience product line, a family of acoustical treatments designed for exceptional performance with a custom look, all at an affordable price.

About Auralex Acoustics
