

**FOR IMMEDIATE RELEASE**

**AURALEX ACOUSTICS INTRODUCES THE  
SPACECOUPLER™ AT AES 2005**

**NEW YORK CITY, October 7, 2005**—Auralex Acoustics, Inc., the industry leader in innovative sound control solutions, is proud to announce the availability of the new SpaceCoupler™ at AES 2005, booth #150. The SpaceCoupler provides alternatives to traditional reflective, absorptive, or diffusive acoustical treatments.

"The SpaceCoupler is ideal for creating a big sound in a small room," says Jeff Szymanski, chief acoustical engineer for Auralex. "It also can be used as a visual screen to block direct reflections, or installed over a highly absorbent surface to effectively increasing its acoustical efficiency."

Designed by Russ Berger for Auralex Acoustics, the SpaceCoupler optimizes acoustical environments for a wide range of performance and recording styles. By providing an acoustical boundary interaction between loosely coupled spaces, the SpaceCoupler generates a low level reverberant tail to create a full, well-developed sound even in small footprint spaces. Strong and lightweight, the beautiful 24"x24" solid wood panels install easily and can be used in a variety of placement options, including "T-bar" grids.

The SpaceCoupler is one of the first offerings in the new pArtScience product line, a family of acoustical treatments designed for exceptional performance with a custom look, all at an affordable price.

**About Auralex Acoustics**

Located in Indianapolis, Auralex Acoustics was founded in 1977 with a mission to provide the best acoustical treatment products at the best value. Since then, thousands of satisfied Auralex customers have experienced improved acoustics, solid advice and exceptional customer service. Auralex products enjoy widespread use among many prominent artists, producers, engineers and corporations.
