

FOR IMMEDIATE RELEASE

AURALEX ACOUSTICS INTRODUCES FIRE-RATED WOOD ACOUSTICAL TREATMENTS AT AES 2007

NEW YORK, NY, OCTOBER 5, 2007 — Auralex Acoustics, Inc., the industry leader in innovative sound control solutions, announces that its **pArtScience SpaceArray™** and **SpaceCoupler™** have recently passed the requirements of a “Class B” fire-rating. Unique in the industry for wood acoustical treatments, the SpaceArray and SpaceCoupler continue to deliver superior performance at a popular price point. The newly rated products will be showcased at AES 2007, booth #654.

Auralex’s SpaceArray and SpaceCoupler have successfully passed testing in accordance with ASTM E84, a standard test for surface burning characteristics of building materials. The test calculates both ‘smoke develop’ and ‘flame spread’. Additionally, the SpaceArray has recently passed acoustical testing in accordance with ISO 17497-1, a standard test method for sound scattering and sound scattering coefficients. The SpaceCoupler is still undergoing final acoustical testing.

Designed by Russ Berger for Auralex Acoustics, the SpaceArray combines excellent hemispherical acoustical diffusion with a top quality wood finish. Based on a quasi-random series that provides superior performance without visual patterning, the SpaceArray is ideal for control rooms, auditoriums, performance venues, listening rooms, home theaters and worship spaces. Strong and lightweight, the beautiful 24"x24" solid paulownia wood panels install easily and can be used in a variety of placement options, including “T-bar” grids.

The SpaceCoupler, also designed by Russ Berger for Auralex Acoustics, optimizes acoustical environments for a wide range of performance and recording styles. By providing an acoustical boundary interaction between loosely coupled spaces, the SpaceCoupler generates a low level reverberant tail to create a full, well-developed sound even in small footprint spaces.

“At Auralex, we strive to offer our customers the best in quality, durability and

safety,” says David Paxton, Director of Operations, Auralex Acoustics. “Our Class B fire-rated SpaceArray and SpaceCoupler give us an edge in the marketplace, as this offering is unique in the industry for wood acoustical treatments. Most professional and home recording studios are filled with an exuberant amount of high-end, expensive equipment; Auralex is making sure that its products fulfill these requirements, while sustaining the pristine audio quality that Auralex is known for.”

The SpaceArray and SpaceCoupler are just two of the offerings in the new pArtScience product line, a family of acoustical treatments designed for exceptional performance with a custom look, all at an affordable price.

About Auralex Acoustics

Located in Indianapolis, Auralex Acoustics was founded in 1977 with a mission to provide the best acoustical treatment products at the best value. Since then, thousands of satisfied Auralex customers have experienced improved acoustics, solid advice and exceptional customer service. Auralex products enjoy widespread use among many prominent artists, producers, engineers and corporations.

Auralex Acoustics has become the industry leader in innovative sound control solutions and continues to enjoy rapid growth through an international network of authorized dealers. Visit the Auralex web page at www.auralex.com. Auralex can be reached via email at auralexinfo@auralex.com or by calling 1.800.95WEDGE.
