

Acoustic Treatment for your Home

Are you hearing your audio system, or are you hearing your room? The answer is both. Is the room contributing in a good way or a bad way? Does your room compliment your audio system, or does it degrade the sound? Are you getting the most out of your audio investment?

Custom Design, Ultimate

Auralex Acoustics specializes in the room.

We personally engineer each listening room, home theater, and audio space for maximum accuracy and entertainment so you always have the best seat in the house!

Allure, Priceless Sound

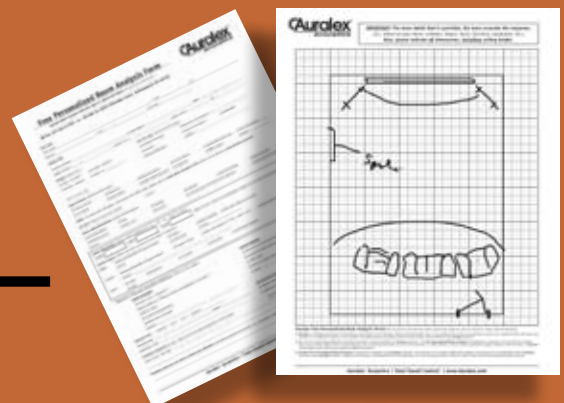

How does it work?

What we hear is always a combination of the direct sound source and the reflected sound from the room. Reflected sounds travel a longer distance and arrive to our ears later than direct sounds, distorting or muddling our perception of the direct sound and making it more difficult to understand. As a result, we turn up the volume and make matters worse.

Auralex has the tools and the expertise to help you control this reflected energy in a way that optimizes the acoustical architecture of your room, without sacrificing aesthetics.

Your space, your sound, your style!

The Process

World's top recording studios use Auralex!...
30+ years of professional recording studio design.

...What's in your theater?

QUALITY SOUND

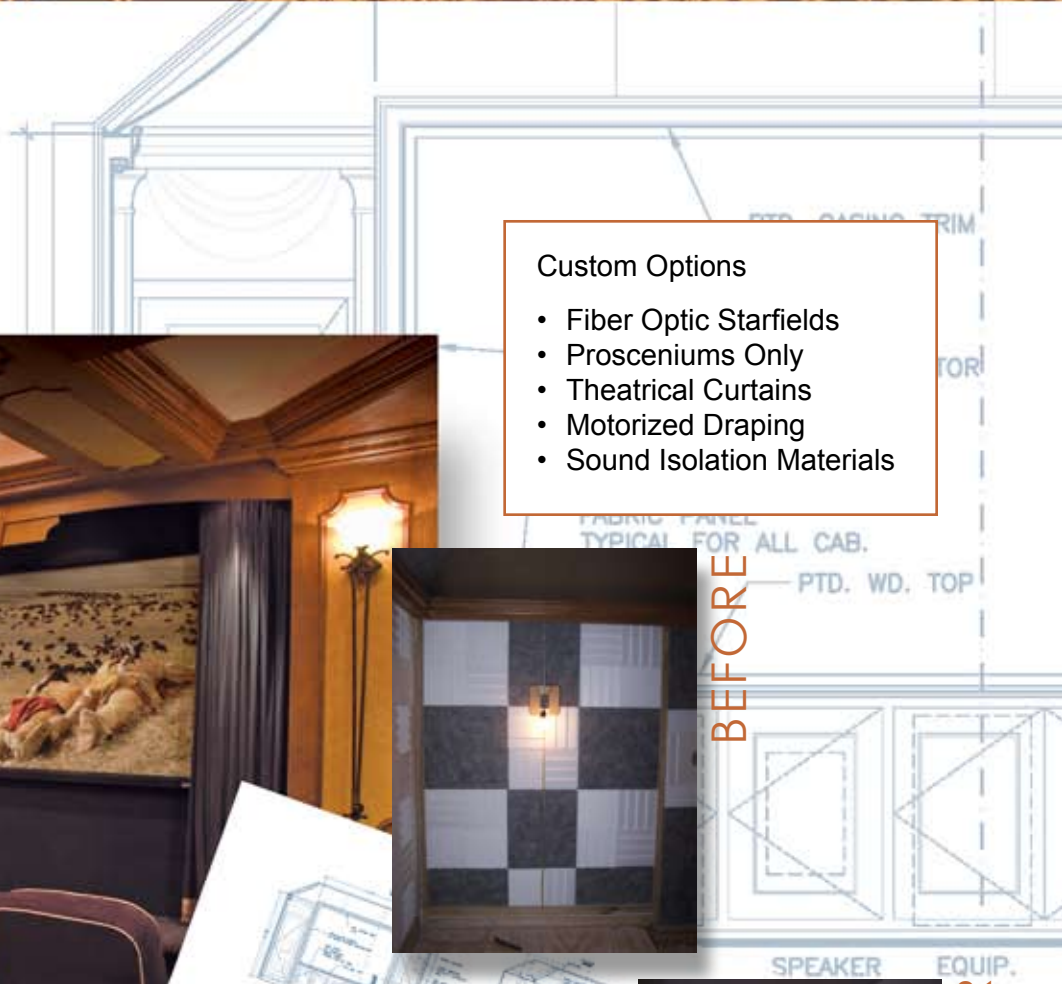

AURALEX CFS – ELITE CUSTOM FABRIC SYSTEM™

The ELITE Custom Fabric System (ELITE-CFS) is Auralex's ultimate combination of acoustics and aesthetics. By enabling the designer to dictate the finished look of the custom-engineered system, any aesthetic need can be realized.

Auralex uses a specialized retention channel and installation process that allows every room to be a custom room. Final layouts and dimensions are determined on site during installation resulting in a perfect finish every time.

AURALEX – CUSTOM OPTIONS

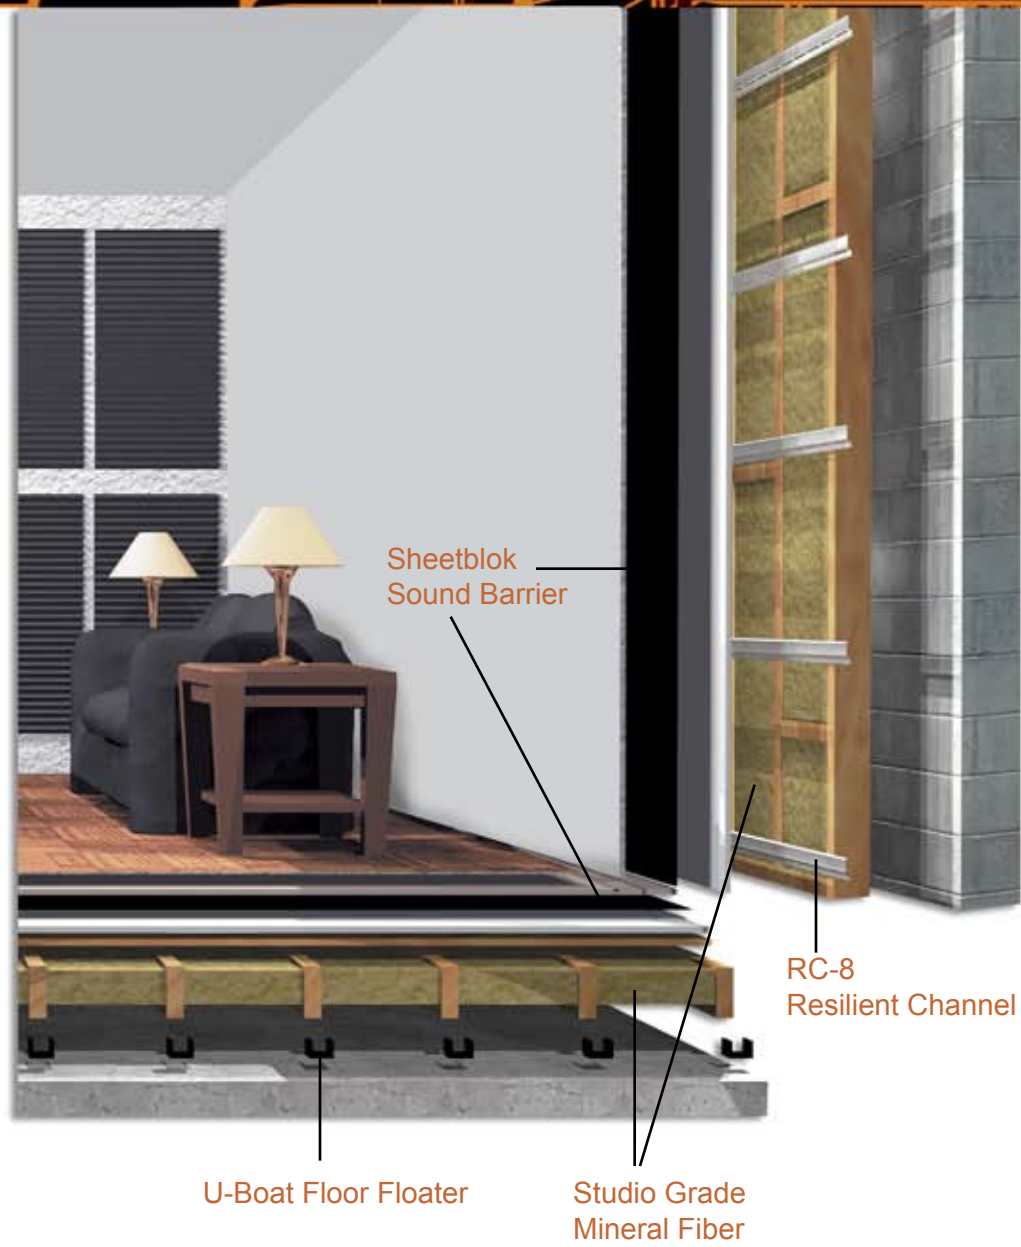

PROSCENIUMS

Auralex offers a custom built option for the most viewed wall in your theater, the proscenium. Our professional installers will travel to your site and build a custom designed false wall that is covered in acoustical fabric. This wall is used to conceal speakers, shadow-box a screen or hide an equipment rack. Upgrades include theater drapes that can be motorized.

ELITE FIBER-OPTIC STARFIELD

Auralex will custom build a Sonolite Fiberoptic Starfield for your specific needs. Using your dimensions, the starfield is manufactured with 3 different size fibers and a night sky-like layout. The system consists of velour fabric that creates a monolithic look. Professional installers will custom fit the starfield on site to ensure the highest quality.

CONSTRUCTION MATERIALS

While Auralex specializes in room treatments to get you the best possible sound quality, we also offer top of the line construction materials to help minimize sound transmission. Reducing noise leakage to other areas of the house requires specialized sound-rated construction materials like SheetBlok Sound Barrier, Mineral Fiber Insulation, RC-8 Resilient Channel, U-Boat Floor Floaters, and StopGap Acoustical Sealant. Auralex can help you or your contractor form a customized plan to meet your sound-proofing goals so you can enjoy your audio system around the clock.

The Sound of Silence

Enjoy a Quiet Home with Auralex Construction Materials

AURALEX – CUSTOM PRINTED PROPANELS

Introducing SonicPrint, Auralex's new artistic acoustical ProPanels. With these custom printed panels you can enjoy superior room acoustics without sacrificing your style.

Choose from our extensive line of licensed images or submit your own artwork for a truly custom finish for any room.

Artistic Acoustical Panels

AURALEX – CUSTOM PRINTED PROPANELS

Your Space, Your

Sound, Your Style

AURALEX – PROPANELS

For the professional needing an aesthetic yet cost-effective alternative to custom fabric systems, Auralex Elite ProPanels are a perfect choice. ProPanels are fabric-covered, acoustically absorptive panels designed to reduce slap and flutter echoes, providing a more pleasing and accurate acoustic environment.

ProPanels are completely customizable, allowing virtually unlimited options regarding acoustic panel design. Custom ProPanels are available in sizes as large as 4'x12' or 5'x10' and up to 4" of thickness. Beyond standard rectangular panels, custom shapes, corners or edging can be created for a truly unique and stunning finish. Choose from hundreds of fabric options to perfectly match any interior environment.

AURALEX – SONOSUEDE™ SYSTEMS

The Auralex SonoSuede Pro and SonoSuede HT systems are a cost-effective, complete do-it-yourself room treatment solution for any critical listening environment. These synthetic suede fabric-covered panels are easy to install, look fantastic and provide the acoustical performance you've come to expect from Auralex.

AURALEX – pArtScience™

Auralex proudly offers the pArtScience product line, a family of acoustical treatments designed exclusively for Auralex Acoustics by **Russ Berger** to deliver exceptional performance with a custom look at an amazingly affordable price! As the preeminent design and consulting source specializing in architectural acoustics and noise control, Russ Berger has more than 2,500 recording, production and broadcast studio projects to his credit, and is an eight-time recipient of the TEC Award for Design Excellence.
