

FOR IMMEDIATE RELEASE

Auralex® Offers SonoFiber™ Panels

INFOCOMM, ORLANDO, FL, JUNE 12, 2013 – [Auralex® Acoustics, Inc.](http://www.auralex.com) (booth 1164), the world's leading brand of acoustical treatments and currently celebrating its 35th anniversary, offers its new SonoFiber™ Panels, available in charcoal gray and arctic white.

SonoFiber is the perfect solution for contractors and system integrators with projects requiring a Class A fire rating without the aesthetic demands of designer treatments such as fabric-covered panels. SonoFiber is ideal for nightclubs, restaurants, gymnasiums, houses of worship, multi-purpose rooms and any other commercial or industrial environment where aesthetic concerns are secondary to performance and safety.

SonoFiber is a 1" thick natural fiber acoustic absorptive panel that offers significant advantages over the more traditional Class A melamine foam alternatives, including:

- Lower cost per square foot
- Sound absorption coefficients equal to or better than 2" thick melamine products
- A flexible form that will not puncture or break like melamine panels
- Safe, easy, dust-free installations

For more information, please visit www.auralex.com.
