

HoverDeck™ v2

USER GUIDE

INCLUDES:

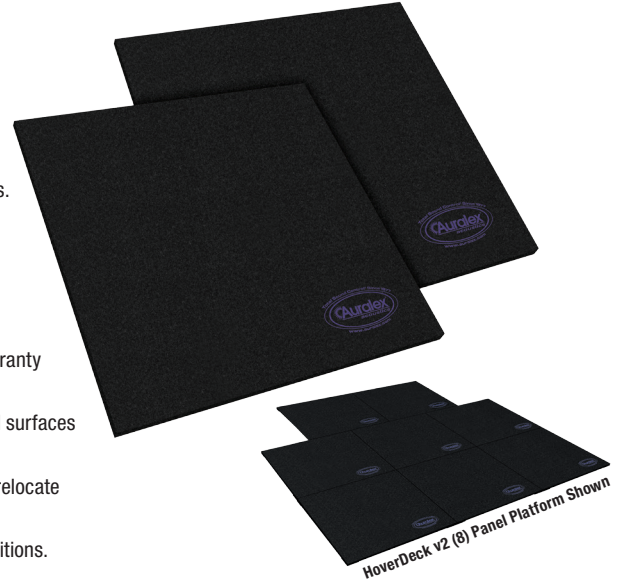

- (2) **HD v2 Platforms**
- (3) **18" Double Sided Hook Strips**
- (1) **User Guide**

ASSEMBLY:

1. Place first panel in one of the corner positions of your platform array.
2. Apply a double-sided hook fastener strip to the edges of the panel that will be joined to adjacent panels. The fastener strips are double sided and adhere directly to the fabric covering of the panel.
3. Align the next panel in your array with the first panel and push together with moderate pressure. Repeat this process for all remaining panels.

IMPORTANT!:

- The **HoverDeck v2** surface is intended for use with rubber stoppers. **Auralex Acoustics** does not warranty the surface finish of the **HoverDeck v2** from wear and tear caused by drum kit spikes and spurs.
- **HoverDeck v2** is intended to be used on a hard floor surface or a thin carpet. Heavily padded carpeted surfaces will minimize the structural isolation benefits of your **HoverDeck v2**.
- Sliding fully assembled **HoverDeck v2** platforms is not recommended. It is better to disassemble and relocate the **HoverDeck v2** platform sections to your desired location.
- Do not expose your **HoverDeck v2** to prolonged periods of intense, direct sunlight or damp/moist conditions.
