

## Each Kit Includes:

### SonoLite™ SonoKit-1™:

- (8) SonoLite Panels
- (2) SonoLite Bass Traps
- (40) EZ-Stick Pro Tabs

### SonoLite™

### SonoKit-2™:

- (12) SonoLite Panels
- (4) SonoLite Bass Traps
- (64) EZ-Stick Pro Tabs

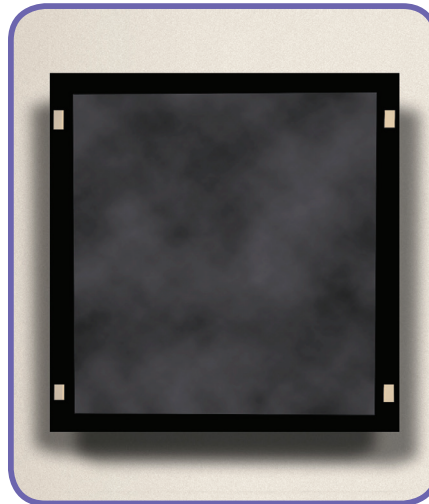

## WALL INSTALLATION:

### Auralex® EZ-Stick™ Pro Tabs included:

**NOTE: EZ-Stick Pro Tabs are permanent and will cause damage to mounting surface or product upon removal.**

- 1 Using a level, locate where the panels will hang. Use a pencil to mark the final **SonoLite Panel** locations on the walls, and **SonoLite Bass Trap** locations in the corners of the room where the walls and/or ceiling meet.
- 2 Spot clean the target attachment points on wall with rubbing alcohol.
- 3 Separate the **EZ-Stick Pro** tabs from each other. Remove one of the release layers from the tab and attach to the rear surface of the **SonoLite Panel** just inboard of the fabric edge or attach to the rear mitered surface of the **SonoLite Bass Trap**. Press firmly and hold for 30 seconds for best adhesion. Repeat for the remaining tabs.  
*(use 4 tabs per panel)*
- 4 Remove the second release layer from all of the **EZ-Stick Pro** tabs, align with the locating marks on the wall and press firmly on the front side of the panel, opposite the tabs to adhere to the wall.

### SonoLite™

### SonoLite™ Bass Trap

Thank you for purchasing **SonoLite™ Absorption Panels**. They are a great solution to improve both the aesthetics and sonic clarity of any home studio or small home theater.
